

FARO Organizes BIMovation as part of the Geospatial World Conference

FARO, a 3D measurement and imaging company for Construction BIM, has confirmed its presence at [Geospatial World Forum 2019](#) (GWF) as a corporate sponsor. The event will take place from 2-4 April 2019 in Taets Art & Event Park, Amsterdam.

Andreas Gerster, vice president – Global Construction BIM, along with other executives and customers will address the audience at the conference.

To illustrate the multiple advantages that BIM provides to potential customers, and to demonstrate the most up-to-date laser scanning technology and software, FARO has launched the FARO BIMovation roadshows. This year's European BIM event will take place as a pre-conference event on 1 April 2019 at GWF's location.

"We are very happy to showcase our technological solutions and cutting-edge techniques of 3D construction planning at the GWF. It is a great opportunity to present our capabilities in capturing, processing and applying 3D scan data throughout the building lifecycle. It is also a chance for us to meet with the geospatial industry's main actors here in Amsterdam," says Andreas Gerster.

The event runs on 1 April from 09:30 to 16:30 at the FARO BIMovation Roadshow where attendees will discover FARO's reality capture solutions that help increase efficiency in 3D data capturing and processing. With key note speakers, the BIMovation roadshow will keep you up to date with the latest updates in digital construction.
