

GeoMax Wins Contract for Lasers with GAP Hire Solutions

GeoMax has won a contract with GAP Hire Solutions, a leading UK hire equipment company who provides the civil engineering and construction industries with the highest level of accuracy, robustness and premium quality equipment.

GAP has worked with GeoMax since the inception of their Survey and Safety Division because of their strong reputation for producing innovative products. The products are designed by users for users and are manufactured to the highest standards to incorporate easy to use software.

GAP's latest order of 40 [Zone20 H](#) and [Zone60 Dual Grade](#) fully automatic dual grade rotating lasers brings their total fleet of GeoMax equipment to over 200 systems.

Jim Burke, Survey Division Manager, GAP Hire Solutions said "The latest Zone 20H has some unique features which gives our clients important additional functionality. My team is impressed with how easy the equipment is to use and service, as well as how quickly our clients are able to start using it in field."

David Price, Director of a UK GeoMax Distributor said "The Zone20 H and Zone60 DG have yet again proven that the combination of unique features and robust reliable performance set the standard for construction lasers in the rental market."
