

thinkWhere is one of the UK's leading providers of location-based information services. Put simply, we're great at helping people use geographic information and GIS to work in more efficient and profitable ways.

- Online GIS Services
- Data Management
- Consultancy
- Training Courses

Locating Your Business Potential

At thinkWhere we truly understand the power and potential of location-based information to unlock business intelligence.

As everything happens somewhere, mapping your data or linking it to geographic features enables you to visualise your data in new ways and to analyse patterns in your data that were previously hidden.

We have extensive experience working with public and commercial organisations over the last 20 years in areas as diverse as asset management, environmental assessment, facility planning, routing, land & property management and statistical analysis.

We focus on the complete lifecycle for location-based information, with a focus on realising benefits through the practical application of web, database and GIS technologies, effective business processes and underlying data management best practice.

Online GIS

Location Centre, our flagship product, is a complete online GIS service. Integrating business data into Location Centre allows users to visualise, analyse and communicate their data in new and easily understood ways.

Managing, exploring and sharing location-based information is easy and the intelligence produced can help mould your organisation's planning, performance and management processes. As an Open Source web GIS platform, Location Centre provides data sharing, workflow management and operational flexibility at an extremely competitive price.

- Hosted GIS system allows for instant access anywhere
- Flexible subscription and pricing models
- Private Cloud – store everything and access it instantly
- Full range of industry-standard GIS tools
- Share information as embeddable interactive maps
- Access to national mapping datastore

Consultancy

Looking for fresh perspective? Whether you're looking for Strategy Development, Project Management, Spatial Analysis or Application Development, our consultancy team will always consider the technical, system and business elements associated with a project.

With a range of business, IT and GIS backgrounds, our consultants can bring fresh ideas to a whole range of projects and provide you with a complete support package.

- Business Strategy
- Business Analysis
- Project Management
- Spatial Analysis
- Application Development
- Service Management & Support

Data Management

thinkWhere has over 15 years of experience in providing high quality GIS and gazetteer data management services. We provide a comprehensive data management service that ensures that you and your team get the most out of your data. Our Data Management training can also give you skills you need to manage all kinds of geographic data.

As an Ordnance Survey Licensed partner, thinkWhere can provide a range of OS commercial digital map datasets directly. We can also source other data sets on your behalf.

- Data Processing
- Data Auditing
- Data Quality Assurance
- Metadata Solutions
- Dedicated Data Management Training

Training Courses

Getting the most from GIS can be challenging if you're not sure how to tackle what can be a complex subject. We offer a wide portfolio of competitively priced, targeted GIS training courses, which cover every aspect of the GIS lifecycle. From the GIS novice just starting out, to the experienced user looking to expand their knowledge, we have training courses suitable for all.

- Courses cover a range of Open Source and commercial GIS software
- Bespoke training to meet your needs
- Courses accredited by the Association of Geographic Information (AGI)
